

MOHIB ULLAH

Laravel Developer

[LinkedIn](#) | +92 349 5579208 | mohibemails@gmail.com | [GitHub](#)

PROFESSIONAL SUMMARY

PHP / Laravel Developer with 3+ years of experience building and maintaining scalable web applications, RESTful APIs, and enterprise systems including ERP platforms handling large-scale data. Skilled in Laravel Eloquent ORM, MySQL database design, third-party API and payment gateway integration, and RBAC-based authentication. Experienced across the full stack with React, Vue.js, and modern frontend tooling, plus additional expertise in Shopify and WordPress development. Strong track record collaborating in Agile teams to deliver production-ready features on schedule.

EDUCATION

BS Software Engineering

2020 – 2024

Islamia University of Bahawalpur, Bahawalpur, Pakistan

CORE SKILLS

- Languages & Frameworks: PHP, Laravel, JavaScript (ES6+), HTML5, CSS3
- Laravel Ecosystem: Eloquent ORM, Migrations, Middleware, Queues, Events, Jobs, RESTful APIs, Blade
- Frontend: React, jQuery, AJAX, Bootstrap, Tailwind CSS, DataTables
- Databases: MySQL, PostgreSQL — schema design, query optimization, complex queries
- E-commerce & CMS: Shopify development, WordPress development & customization
- Integrations: REST APIs, Payment Gateways, Third-Party APIs, SMS & Email Integration, PDF & Excel Report Generation
- Tools & Practices: Git/GitHub, Agile & Scrum, OOP, RBAC & Authentication, Debugging, Linux Server Basics
- Familiar with: Docker, Redis, Queue Workers (production exposure)

PROFESSIONAL EXPERIENCE

Laravel Developer — Cloud Rexpo

Apr 2026 – Present

Islamabad, Pakistan

- Working as a Laravel Developer on a large-scale ERP system, handling modules that process high-volume enterprise data for the client's operations.
- Develop and maintain backend modules, RESTful APIs, and business logic within a modular Laravel architecture.
- Collaborate with a cross-functional development team to deliver features on schedule, following Agile practices from planning to release.
- Optimize database queries and application logic to maintain performance and stability under large data volumes.
- Contributed to the successful delivery of the ERP project from active development through to completion.

Backend Developer — Friends IT Solution

Aug 2025 – Apr 2026

Islamabad, Pakistan

- Developed and maintained backend systems using PHP (Laravel), implementing RESTful APIs, business logic, and secure authentication.
- Designed and optimized MySQL databases, wrote complex queries, and managed migrations to ensure data integrity and performance.
- Collaborated with frontend and QA teams to integrate APIs, fix backend issues, and improve application stability and response times.

PHP Laravel Developer — It-Linked

Sep 2024 – Aug 2025

D.I. Khan, Pakistan

- Built and maintained scalable Laravel applications using PHP and MySQL, focusing on clean architecture and performance.
- Designed and integrated RESTful APIs, enabling secure data exchange with internal systems and third-party services.
- Implemented authentication, authorization, and RBAC, ensuring secure and role-based access across applications.
- Designed and optimized database schemas, wrote complex queries, and performed migrations to ensure smooth data management.
- Collaborated in Agile/Scrum teams, using Git for version control, code reviews, and reliable deployments.

Front End Developer — 7 Skies Solution

Aug 2023 – Jul 2024

Bahawalpur, Pakistan

- Developed and maintained responsive web applications using React, JavaScript, Bootstrap, and Tailwind CSS.
- Designed and implemented reusable UI components to ensure consistency and faster development across multiple projects.
- Collaborated with backend engineers to integrate RESTful APIs, ensuring smooth data flow and optimized performance.

Software Engineer, Intern — Intellix Soft

Jan 2023 – Aug 2023

Bahawalpur, Pakistan

- Assisted in the Software Development Life Cycle (SDLC), including requirements gathering, design, coding, testing, and deployment.
- Gained exposure to project management methodologies by collaborating with cross-functional teams on software deliverables.
- Documented technical processes and contributed to knowledge sharing within the development team.

KEY PROJECTS

- **My-Bahria** (*Property Management System*) — Laravel-based property platform with a backend CMS to manage users, listings, and frontend content, integrating APIs and Laravel packages for scalable data control.
- **BIORD** (*Medical / Dental CMS*) — Built and maintained a CMS-driven dental website using Laravel, enabling dynamic content management and secure backend administration for medical services.
- **LetSky** (*Visa Management System*) — Developed a visa management system with application processing, transactions, agency/staff management, and role-based access.
- **Hashtag Tours** (*Travel & Tours Platform*) — Worked on a Laravel-based tour company platform featuring dynamic packages, content management, and backend-controlled frontend data.

CERTIFICATIONS

- Google Project Management — Agile, Scrum, Waterfall methodologies (Oct 2023)
- Programming in JavaScript — Core JavaScript & ES6+ features (Feb 2024)
- Introduction to Backend Development — Server-side logic, RESTful APIs, databases (May 2024)
- Google UI/UX Design — Wireframing, prototyping, responsive design (Nov 2024)
- WordPress Development — Certificate ID: F5HR69FMK (Jun 2023)
- Google AI Essentials — Foundational AI knowledge (Aug 2024)
